

## Brief Study Guide for Test 3<sup>1</sup>

### Chapter 10: Health Care Settings and Technologies

1. Know the histories of hospitals and nursing homes? What existed prior to them, what caused them to grow rapidly in numbers, are they primarily for-profit or non-profit, and what has the government done to control costs of each?
2. What are DRGs? What was their intended purpose?
3. What is hospice and respite care?
4. What do we know about prostate cancer and what could be done?

### Chapter 11: Health Care, Health Research, and Bioethics

1. What is allopathic and homeopathic medicine? How are they different? Which has dominated medicine and why?
2. What is the Flexner Report? What did it conclude and recommend? What were its effects?
3. What caused the decline of the American Medical Association? To whom did they lose their dominance?
4. Why was RBRVS adopted? What is it?
5. What is the history of medical schools? What caused them to become more professional?

### Alternative Medicine discussed in powerpoints

1. Why are supplements treated differently from other pharmaceutical drugs?
2. What reasons do pharmaceutical companies provide for discrediting supplements?
3. What training do chiropractors receive? What is their specialty?
4. What training do Midwives receive? Why are they popular today?
